

## Automate FP&A Processes with Confidence

### Snowflake-Guaranteed Peace-of-Mind

Elementum auto-inherits Snowflake governance and compliance measures. It allows FP&A teams to focus on strategic work while Elementum's data driven workflows automate critical functions, such as invoicing, expense management, and reporting.

### Say Goodbye to Lengthy Email Chains

Elementum's self-service portals offer stakeholders full visibility, enhancing partner relationships, increasing productivity, and ensuring measurability.

### Automatically Update to ERPs

Elementum keeps systems of record in sync with API-Out capabilities, ensuring end-to-end automation.

## Streamlining Audit Preparation with Elementum

### Challenge:

Preparing for audits is intricate and time-consuming. It requires collecting vast amounts of data from multiple parties, verifying compliance with multiple regulatory standards, maintaining a transparent audit trail, and rectifying any identified discrepancies.

### Solution:

Elementum automates the collection and verification of financial data, guarantees compliance through inherent checks, provides an automated and transparent audit trail, and swiftly tackles discrepancies by monitoring and delegating them for resolution.
